

Rhino Refresher 2026

**Free for
ERS members**

03.10.2026

Save the date: ERS's Rhino Refresher returns on 3 October. It will run fully online and aimed at both trainees and more senior ENTs.

Now held biannually between congress years, Rhino Refresher offers a dense, single-day update spanning the full breadth of rhinology: we will have short talks on chronic rhinosinusitis, sinonasal malignancy, frontal sinus surgery, skull base surgery, complications, immunology of CRS, granulomatous and vasculitic diseases of the nose, non-allergic and allergic rhinitis, and rhinoplasty outcomes, alongside dedicated panels on optimising outcomes in CRSwNP and on sinusitis versus facial pain versus headache.

Broader sessions this year branch beyond core rhinology into surgical safety, human factors, ethincs, and global health engagement.

With over 30 speakers across a single condensed day, Rhino Refresher remains one of the most efficient ways to stay current across the full spread of rhinological practice — wherever you're logging in from.

CME accreditation will be available.

This is free to register and is accessible for members only - if you would like to join please use this link [Here](#).
